## Mandarin for Children

**"Play and learn"** is the theme of our children's courses, which are age-specific and match the developmental level of our students. We tailor make each course to integrate Mandarin skills in a diverse range of playful activities that appeal to children's instincts to learn. Immersed in a Mandarin environment, the children will acquire speaking skills quite effortlessly. Older kids may also be taught reading and writing, which will prepare them well for the future.

By engaging our young pupils in meaningful play, our courses also promote their overall growth and development. For instance, rhymes and stories help expand children's minds while crafts projects help enhance sensory-motor abilities and playful games provide practice for developing social skills.
